NOTICE OF ALLOWANCE

Reasons for Allowance

Claims 1-47, and 51-56 are allowed.

The following is an examiner's statement of reasons for allowance: Applicants' arguments filed on September 13th, 2005 are persuasive with respect to the fact that the combination of U.S. Patent no. 4,269,654 to Deckert et al. in view of Protasov et al. (Thermo-optical Characteristics of Refractory Dielectric Materials in a Field of High Intensity Radiation, Dielectric Materials, Measurements and Applications Conference Publication No 473, @ IEEE 2000) do not suggest silicon nitride and aluminum oxide, when exposed to an etching solution comprising HF and an organic HF solvent, could be utilized under conditions effective to etch the silicon nitride substantially selectively relative to aluminum oxide, as remarked on page 15. The prior art of record does not disclose or suggest a method of etching a silicon nitride substantially selective to an oxide of aluminum using etching solution comprising HF and organic HF solvent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Remarks

Applicants' amendment filed September 13th, 2005 is sufficient to overcome the previous rejection under 35 USC § 112, second paragraph rejection (cited in office action of July 11, 2005) towards Claim 1. As a result, the 112 second rejection is withdrawn.

Reconsideration of the use of "substantially selective" finds paragraph [0027] define the term, therefore, the rejection is withdrawn.
